Changes in SP8600 Firmware

Dear SP8600 users,

The SP8600 firmware has been updated to fix minor bugs related to printing

issues in the "Location Marking" mode and "Mode 3 Marking" mode.

You can download the revised firmware from our website and update the firmware
using the PCMS software.

1．Problems Fixed
　①While in "Location Marking" mode, the drive motor may fail to operate
　　correctly, resulting in a narrower pitch between terminals.

　②While in "Location Marking" mode, printing defects may occur in the location
　　name.

　③While in "Mode 3 Marking" mode, key input may become unresponsive in the
　　middle of marking.

2．How to Download the Firmware and Fix the Bugs
　Download the revised firmware from our website and update the firmware of
　the SP printer using CTKPCMS.

3．Version of the Updated Firmware
　Ver.1.00.35e

Sincerely.

CTK Corporation
